# The Committee of Ways and Means

Is the most important one in Congress. The physician, when called upon to treat a case of Typhoid Fever, must resolve himself into a committee of one to devise "ways and means" to combat the disease. Nutrition is of vital moment.

Liquid Peptonoids possesses the following essential qualities AS A FOOD:

1st. Palatability.
2d. All the elements of nutrition.
3d. Pre-digested condition.
4th. Peptogenic potency.
5th. Slightly stimulating effect.
6th. Aseptic state.

Is it any wonder, therefore, that it is a favorite nutriment in Typhoid Fever?

Note:—If an efficient antiseptic remedy is desired **Liquid Peptonoids with Creosote** should be administered, thus furnishing at the same time both food and medicine.

THE ARLINGTON CHEMICAL CO. YONKERS N.Y.

"Borolyptol"

# Its Bacteriology

The crucial test of the efficacy of an antiseptic fluid is the bacteriological one. When we state that BOROLYPTOL is equal in germicidal potency to a 1-1000 solution of Corrosive Sublimate without the irritant or toxic properties of the latter drug, we base our claim upon the results of careful laboratory experimentation with the different varieties of germ life. We have full, complete and conclusive reports from the bacteriologists of the N. Y. Post-Graduate Medical School, City Hospital at Boston, and the Garfield Memorial Hospital at Washington. These will be sent upon request.

BOROLYPTOL is palatable, fragrant, and slightly astringent. It does not stain linen or clothes. It should be employed in Gynecology and Obstetrics, Rhino-Laryngology, Surgery and Dentistry. Also internally in the treatment of Typhoid Fever and in the gastro-intestinal disorders of children.

Send for "Expert Evidence."

# Miss Alston's House,

## 143 West Forty-seventh Street.

Formerly 106 East Thirty-Fourth Street.

## New York.

Miss A. L. Alston, for nearly eight years Superintendent of Mount Sinai Training School for Nurses, opened in September, 1894, a house for the reception of private patients. Being unable to supply the demand for rooms a larger house has been fitted up with all modern improvements, elevator, etc., which will materially add to patients' comfort. All classes of patients, male and female (including maternity cases) will be received, except patients suffering from contagious diseases or insanity.

Miss Alston's long and thorough experience will insure the best of nursing and general supervision for those who are in her charge. Great attention will be paid to the careful and appetizing preparation and serving of the food. The table will be much like that of a first-class metropolitan household. As the number of rooms in the house is limited, meals will be served in the patient's room.

Long distance telephone in the house.

For circulars and information inquire at above address.

The house will be open the entire year.

# Leavens' Sterile Sutures.

STERILIZED AT 250° FAHR. AFTER SEALING.

The Sutures are absolutely sterile. This has the guarantee furnished by direct tests in the laboratory and a strict adherence to bacteriological principles in the manufacture.

## THEY WILL ALWAYS REMAIN STERILE.
## THEY ARE ALWAYS READY FOR USE.

The Suture, prepared to withstand the severe process of sterilization, is introduced with absolute alcohol into a glass tube. The tube is sealed in the flame of a blast-lamp, and the tube and its contents then sterilized at a temperature of **121½° Centigrade (250° Fahrenheit) for forty-five minutes.** The alcoholic vapor penetrates the interstices of the Suture and **is at this temperature absolutely destructive of all germ life.**

This process yields a perfectly aseptic Suture, enclosed in an hermetically sealed tube, absolutely precluding contamination before the tube is broken.

Each tube contains a slip of paper, upon which is the autograph shown in the cut and a printed number indicating the size of the Suture.

# GALPIN'S
# Analytical and Microscopical Laboratory.

DEAR DOCTORS:

In calling your attention to our Laboratory, we wish to emphasize the points which distinguish it as valuable for your patronage.

1st: That the average busy physician has no time to make his own Chemical or Microscopical Analysis.

2nd: That physicians prefer their work done outside, if they can obtain absolute results. (This we know from experience.)

3rd: That the fumes, acids, staining reagents, etc., all add annoyance to the physician

4th: That our charges are reasonable and our work is commended to you with confidence that you will find it gives surprising advantages to your diagnosis and credit to yourself.

Owing to the increased business I have been able to procure the services of R. D. Young, Phar. M.; B. S., Graduate of Harvard. Formerly Assistant Chemist in Government Experiment Station, at Geneva; also Assistant Chemist at Ann Arbor University, as assistant in this department.

For any expert Chemical or Microscopical Investigation we invite an interview.

Has gained, since its introduction (11 years now) the highest esteem and confidence of the medical profession. Every attention and the best of care is given at every step of its manufacture to preserve its absolute purity and maintain the high standard of quality it has always enjoyed. , . . . . .

---

DR. T. GAILLARD THOMAS says, New York, November 13th, 1888: "Having used DR. M. G DADIRRIAN'S MATZOON extensively in my private practice and Sanitarium for the last three years with very pleasing results, I can safely recommend it."

PROF. J. LEWIS SMITH, M. D., of New York, says July 24th, 1888: "I have used Dr. DADIRRIAN'S MATZOON in case of *Bright's disease* with very satisfactory result when other kinds of food were vomited."

As given by PROF. S. G. DIXON, M. D., in his lectures, 1888, to his class at the University of Pennsylvania: "MATZOON, prepared by DR. DADIRRIAN, contains but a trace of carbon dioxide. For this reason it is preferable to kumyss in case of a weak heart Charged waters, champagne, and kumyss are risky to give to a patient with a weak heart. The pressure produced upon the heart by the distension of the stomach walls is quite sufficient to produce death when the heart's action is very weak."

***The Tonics***—Quinine and Strychnine;

***And the Vitalizing Constituent***—Phosphorus; the whole combined in the form of a Syrup with a ***Slightly Alkaline Reaction.***

***It Differs in its Effects from all Analogous Preparations,*** and it possesses the important properties of being pleasant to the taste, easily borne by the stomach, and harmless under prolonged use.

***It has Gained a Wide Reputation,*** particularly in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs. It has also been employed with much success in various nervous and debilitating diseases.

***Its Curative Power*** is largely attributable to its stimulant, tonic, and nutritive properties, by means of which the energy of the system is recruited.

***Its Action is Prompt;*** it stimulates the appetite and the digestion, it promotes assimilation, and it enters directly into the circulation with the food products.

The prescribed dose produces a feeling of buoyancy, and removes depression and melancholy; *hence the preparation is of great value in the treatment of mental and nervous affections.* From the fact, also, that it exerts a double tonic influence, and induces a healthy flow of the secretions, its use is indicated in a wide range of diseases.

# The Attention of Physicians

is respectfully solicited to this make of Sanitary Underwear. Being composed of the very finest Australian, natural wool, free from dye, of remarkably fine texture; it possesses qualities which render it particularly beneficial for delicate individuals, as it is of so smooth a surface, and so finely, closely knit, that it is warm without being heavy or bulky, and the smoothness of its surface prevents irritation of the cuticle, so objectionable in some makes of wool underwear.

## Mattelutz Steam-Shrunk Sanitary Underwear

is made not only in all wool fabrics but the same fine tissue is also made with an admixture of cotton. The Mattelutz Sanitary Underwear is made in the neighborhood of Stuttgart, Wurttemberg, a locality famous for the production of fine knit wool fabrics. This underwear is STEAM SHRUNK, and, consequently, with ordinary care in the laundry, will be found practically unshrinkable. The Medical Society can with confidence recommend these garments to their patients, and we respectfully present them to their kind consideration.

# ANTITOXINS.

## (GIBIER'S.)

As may be seen through numerous cases reported in the various medical journals, the Antitoxins produced at the N. Y. Pasteur Institute have yielded results which may be compared advantageously with any of those published in Europe.

We offer to the profession the *genuine*, *original* antitoxins in the highest degree of strength or immunizing power obtainable.

**DIPHTHERIA ANTITOXIN.** -(Recent experiments show 300 per C. C.)
**TETANUS ANTITOXIN**—(in dry form), one vial containing 3 grms. of powder, equal to 36 c. cm. of the serum. Immunizing power: 1-1,000,000.
**DOUBLE ANTITOXIN**—*Diphtheria*, and *Streptococcus*, 25 c. cm. in fluid form.
**STREPTOCOCCUS ANTITOXIN**—(in dry or fluid form), 25 c. cm. in fluid form.
**TUBERCULOSIS IMMUNIZED SERUM**—from the mule.
**SYPHILIS IMMUNIZED SERUM**—from the horse. (Prof. Richet's formula).
**ERYSIPELAS AND PRODIGIOSUS TOXINS**—for Sarcoma and Cancer.
**VACCINE VIRUS**—in sealed glass tubes in liquid form, 2 Vac. in 1 tube, 25c.
**ANIMAL EXTRACTS**—(according to Brown-Sequard's method).

## DO NOT FORGET

**That** the first diphtheria antitoxin made in this country and placed at the disposal of the profession was prepared at the N. Y. Pasteur Institute. Owing to this early start and the use of a special method, we claim to have the strongest antitoxin made in this country.

**That** one vial of Gibier's *Double Antitoxin* contains 25 c cm. (over 2,500 units) and is a combination of *Diphtheria and Streptococcus Antitoxic Serum* from the horse immunized against both diphtheria (over 1:100,000) and streptococcus erysipelatis. It has been demonstrated that the failure of ordinary diphtheria antitoxin is frequently due to the presence of a mixed infection, the principal agent being the streptococcus. Therefore, the two antitoxins have been combined to overcome this difficulty.

**That** whereas, antitoxin was the source of a speculation which made it almost unobtainable, save by the rich, our antitoxin was offered to you at the same price it is sold to-day, and this price is still lower than that of any other.

**That** we can prove that since October, 1894, over 15,000 doses of antitoxin have been sent out from our laboratory.

**That** the first cases of Tetanus (lock jaw) cured with antitoxin on this continent were treated with the *Tetanus Antitoxin* made at the N. Y. Pasteur Institute, and the only one thus far obtainable in this country.

**That** the N. Y. Pasteur Institute is an institution which for many years has been devoted exclusively to the preparation of antitoxins and similar biological products.

**That** the N. Y. Pasteur Institute is the only institution in the country which devotes an experimental station and farm of 200 acres, with over 100 head of cattle, horses, donkeys, pigs, dogs, sheep etc., for the study and production of antitoxins. (This farm is located at "Pasteur", near Suffern, N. Y.)

Entered according to Act of Congress, in the year 1896, by Daniel Lewis, in the Office of the Librarian of Congress at Washington, D. C.

# PREFACE.

Physicians have returned the corrections for the lists in the Directory with unusual promptitude, thus enabling us to publish the book several weeks earlier than in former years. This result will be appreciated by those who have changed their residences on May first, as well as by the profession at large, in whose interests the book is published.

The increasing size of the volume from year to year compels us to omit some data which have been returned, but none which are essential factors in an accurate and complete register of medical practitioners in the three States, New York, New Jersey and Connecticut.

The Editor hereby acknowledges his great obligation to all who have so generously co-operated in preparing the Directory for the press.

# Scott's Emulsion

of Cod-liver Oil, with the Hypophosphites of lime and soda, contains a definite quantity of cod-liver oil thoroughly emulsified, and an exact amount of the hypophosphites.

The doctor knows far better than the patient or the druggist what remedy is best, and whose preparation is the most reliable. When Scott's Emulsion is prescribed, direct the patient to a druggist who will dispense this particular preparation. The physician is often blamed for failure to cure, when the fact is his patient has not been taking what was ordered, but something else which he was told was "just as good."

# Vigor Chocolate

Celebrated Throughout Europe and Known as
"KRAFT CHOCOLADE."

Prepared in accordance with the Recipe of Professor Von Mering of the University of Halle, Germany.

For the Nourishment of the Weak and Debilitated.

**Vigor Chocolate** is an agreeable Dietetic Preparation and easily Digestible Nutrient. It will sustain prolonged nutrition. It tempts the most capricious palate, is well borne by the intractable stomach of the Invalid, and does not pall upon the taste.

**Vigor Chocolate** retains in a readily assimilable form all the fat producing properties of ordinary chocolate, and is available for use as an eligible substitute for Cod Liver Oil,

For Nursing Mothers it yields a healthful and abundant supply of milk. In the convalescence from acute diseases, General Debility, Malnutrition, and Emaciation, **Vigor Chocolate** has been pronounced by the leading authorities as being a reconstructive of inestimable value.

## Sohn's Wine Hypophosphites, Comp.

(ELIXIR VIGORANS).

Should be preferred to all other Hypophosphites, by virtue of

ITS CONSTANCY OF COMPOSITION,
SUPERIORITY OF MENSTRUUM,
EASE OF ADMINISTRATION.

IT IS ABSOLUTELY PERMANENT, PALATABLE—AND

NEVER PRECIPITATES.

**Thus the Last Dose from the Bottle is Exactly Like the First.**

The elimination of the Syrup with its obvious disadvantages and tendency to derange the digestion. The addition of Coca Wine and Glycerine, and the substitution of Nux Vomica (tonic and stomachic) for Strychnine (tonic) gives better therapeutic results The patient is immediately encouraged; the Coca Wine quickly generates a feeling of buoyancy, without subsequent depression, for the Nux Vomica, as shown by Hoppe-Seyler, prevents it.

With Sohn's Wine Hypophosphites Comp.

THE ISSUE IS NEVER IN DOUBT.

# EXTRACTS FROM THE BY-LAWS OF THE COUNTY MEDICAL SOCIETY.

"The annual meeting of the Society shall be held on the fourth Monday in October.

"Stated meetings shall be held on the fourth Monday of every month, except in the months of June, July, August and October.

"Nominations for the officers, censors and delegates, to be elected at the annual meeting, shall be made at the stated meeting in September.

"Members whose dues are unpaid shall not be candidates for any official position in the Society, nor shall they be entitled to vote.

"Every candidate, before signing the By-Laws, shall be required to pay an initiation fee of two dollars, together with the current dues, within three months from the date of his election.

"The Comitia Minora shall recommend no applicant for admission to membership unless he be a graduate from a medical college in good standing or a licentiate of a regular unsectarian State or County Medical Society of this or any other State; or, if his diploma or license be of sectarian character, unless the applicant declares in writing his or her abnegation of sectarian principles and practice."

*Resolution adopted October 28th, 1889.*

"*Resolved*, That, hereafter, members two years or more in arrears of dues shall have their names omitted from the published list of the Society; and that, while thus in arrears, such members shall receive neither the notices of the Society's meetings nor its publications."

# PROTONUCLEIN

Is now recognized by those who have carefully studied its effects as one of the most important therapeutic agents known to the profession.

METCHNIKOFF, who discovered the nature and function of the leucocyte, stated that in his opinion,

> ***"The secret of health will have been discovered when science learns how to increase the number of white blood-corpuscles at will."***

**Protonuclein** produces leucocytosis as soon as taken into the organism, and in this way becomes nature's tissue-builder and antitoxic principle. It is within the leucocyte that all proteid matter is converted into living substance, there that it receives the impress of life, is changed into a cellulized, vitalized pabulum ready for appropriation by the tissue-cells. Protonuclein is obtained from the lymphoid structures of healthy animals by a mechanical process which does not destroy its integrity.

**Protonuclein** *is indicated* in all forms of wasting diseases and asthenic conditions. It rapidly restores the vitality of all the tissues by stimulating and supporting assimilative nutrition. It is indicated in all diseases due to toxic germs and in the treatment of Neoplasms, Ulcers, and all surface lesions, malignant or otherwise. Also as a prophylactic in exposure to contagion or infection.

**Protonuclein** is put up as follows: for Internal Use, Protonuclein Tablets (three grains), in bottles of 100, 500 and 1,000; Protonuclein Powder in Ounces and Half Pounds. Protonuclein Special, for Local Application and Hypodermatic Use, in bottles holding ⅓ Ounce, 1 Ounce and 8 Ounces.

## Doctor :

We respectfully invite your attention to the fact that the Battle Creek Sanitarium is a good place for those cases of chronic indigestion, neurasthenia, insomnia, gastric and intestinal catarrh, constipation, and pelvic disorders which do not yield to the usual measures which can be employed at home.

The advantages afforded by a first-class physiological laboratory for the investigation of stomach disorders, blood examinations, etc., an admirably equipped diet kitchen, a scientifically conducted gymnasium, elaborate and elegant facilities for scientific hydrotherapy, steam heated, thoroughly ventilated buildings, three hydraulic elevators, a corps of twenty thoroughly trained physicians, 250 nurses, a salubrious location—offer an exceptionally favorable opportunity for the successful treatment of chronic invalids of all classes.

Sanitariums under the same management are located at St. Helena, Cal.; Boulder, Col.; Guadalajara, Old Mexico ; and Chicago, Ill.

# Something Good to Eat, and Easy to Digest.

## ◆ ◆ GRANOSE ◆ ◆

A new cereal preparation made from the choicest wheat, by a process which retains all the elements of the grain. By combining the processes of digestion, cooking, and roasting, by the use of special machinery, the wheat is brought into the form of delicate flakes, in which the bran is thoroughly disintegrated, and the starch largely converted into dextrine, and thus made ready for solution by the digestive juice and for prompt assimilation.

## ◆ ◆ GRANOSE ◆ ◆

**Is crisp, delicious, appetizing, and digests quicker than any other cereal preparation. It clears the tongue, rids the stomach of germs, and cures constipation.**

**It is unique; an incomparable food. Babies thrive upon it.**

SANITARIUM HEALTH FOOD CO., Battle Creek, Mich.

---

For the Last Twenty Years **CARAMEL-CEREAL**

**Has been used by the thousands of invalids who annually visit the Great SANITARIUM at Battle Creek, Mich.**

---

**UNCONSCIOUS POISONING.**

An old physician of Chicago remarked the other day: "Thousands of people are poisoning themselves daily, with tea and coffee, without knowing it. A great number of nervous maladies, and indigestion in various forms, are the result of the deleterious effects of the poison of tea and coffee upon the system. I myself made the discovery a good many years ago, that the headaches from which I had suffered for years were due to the use of tea and coffee. I found whenever I took a cup of strong coffee, I had a headache as the result, and I had headaches now and then in spite of what I considered my great moderation in the use of tea and coffee. I concluded to dispense with them altogether, and when I did so, my headaches disappeared and did not return. I have cured scores of chronic headaches by forbidding the use of tea and coffee."

**CARAMEL-CEREAL** is a perfect substitute for tea and coffee. It is aromatic, delicious to the taste, and so nearly resembles coffee as to be easily mistaken for veritable Mocha, although, of course, not by a connoisseur.

# Vapo-Cresolene

Cresolene when vaporized in the sick room will give immediate relief and we positively state that no fear may be felt for a child's life in Whooping Cough or Croup if Cresolene is vaporized from the start.

Cresolene is a product of coal tar, the odor of which is not unpleasant, and may be inhaled for any length of time without harm to the youngest child. Cresolene is used with success both as a remedy and preventative in

**Diphtheria, Scarlet Fever and Measles.**

The vaporizer is six inches high and vaporization is effected by means of a kerosene lamp.

**Vaporizer with Cresolene, $1.50;**
**Cresolene, 2-oz. bottle 25 cents; 4-oz. 50 cents.**

For sale by druggists generally. Send for pamphlet with doctor's testimonials.

## EXAMINATIONS FOR LICENSE TO PRACTICE MEDICINE.

LAWS OF NEW YORK, 1893, CH. 661 ; §145 ADMISSION TO EXAMINATION, AS AMENDED BY LAWS OF 1896, CH. 111, IS AS FOLLOWS :

The regents shall admit to examination any candidate who pays a fee of $25 and submits satisfactory evidence, verified by oath, if required, that he

1. Is more than 21 years of age;
2. Is of good moral character;
3. Has the general education required preliminary to receiving the degree of bachelor or doctor of medicine in this State;
4. Has studied medicine not less than four full school years of at least nine months each, including four satisfactory courses of at least six months each, in four different calendar years in a medical school registered as maintaining at the time, a satisfactory standard. New York medical schools and New York medical students shall not be discriminated against by the registration of any medical school out of the State, whose minimum graduation standard is less than that fixed by statute for New York medical schools. The regents may, in their discretion, accept as the equivalent for any part of the third and fourth requirement, evidence of five or more years' reputable practice, provided that such substitution be specified in the license;
5. Has either received the degree of bachelor or doctor of medicine from some registered medical school, or a diploma or license conferring full right to practice medicine in some foreign country. The degree of bachelor or doctor of medicine shall not be conferred in this State before the candidate has filed with the institution conferring it the certificate of the regents that before beginning the first annual medical course counted toward the degree unless matriculated conditionally as hereinafter specified (three years before the date of the degree), he had either graduated from a registered college or satisfactorily completed a full course in a registered academy or high school; or had a preliminary education considered and accepted by the regents as fully equivalent; or held a regents medical student certificate, granted before this act took effect; or had passed regents examinations as hereinafter provided. A medical school may matriculate conditionally a student deficient in not more than one year's academic work or 12 counts of the preliminary education requirement, provided the name and deficiency of each student so matriculated be filed at the regents office within three months after matriculation, and that the deficiency be made up before the student begins the second annual medical course counted toward the degree. Students who had matriculated in a New York medical

school before June 5, 1890, and students who had matriculated in a New York medical school before May 13, 1895, as having entered before June 5, 1890, on the prescribed three years study of medicine, shall be exempt from this preliminary education requirement.

A medical student certificate may be earned without notice to the regents of the conditional matriculation either before the student begins the second annual medical course counted toward the degree or two years before the date of the degree for matriculants in any registered medical school, in the four cases following:

1. For matriculants prior to May 9, 1893, for any 20 counts, allowing 10 for the preliminaries, not including reading and writing;

2. For matriculants prior to May 13, 1895, for arithmetic, elementary English, geography, spelling, United States history, English composition and physics, or any 50 counts, allowing 14 for the preliminaries;

3. For matriculants prior to January 1, 1896, for any 12 academic counts;

4. For matriculants prior to January 1, 1897, for any 24 academic counts;

But all matriculants, after January 1, 1897, must secure 48 academic counts, or their full equivalent, before beginning the first annual medical course counted toward the degree, unless admitted additionally, as hereinbefore specified when the deficiency must be made up before the student begins the second annual medical course counted toward the degree.

---

*This act took effect March 21, 1896, except that the increase in the required course of medical study from three to four years does not take effect till January 1, 1898, and does not apply to students who matriculated before that date and received the degree of M. D. before January 1, 1902.*

## Notes on the Preliminary Education Requirement.

The regents will accept as fully equivalent to the required academic course any one of the following :

(*a*) A certificate of having successfully completed at least one full year's course of study in the collegiate department of any college or university, registered by the regents as maintaining a satisfactory standard.

(*b*) A certificate of having passed in a registered institution examinations equivalent to the full collegiate course of the freshman year or to a completed academic course.

(*c*) A regent's diploma.

(*d*) A certificate of graduation from any registered gymnasium in Germany, Austria or Russia.

(*e*) A certificate of the successful completion of a course of five years in a registered Italian *ginnasio* and three years in a *liceo*.

(*f*) The bachelor's degree in arts or science, or substantial equivalent from any registered institution in France or Spain.

(*g*) Any credential from a registered institution or from the government in any foreign state or country which represents the completion of a course of study equivalent to graduation from a registered New York high school or academy or from a registerd Prussian gymnasium.

## Extracts from Rules.

*Order of Studies.*—There is no restriction in the order in which studies may be taken. Advanced students who have come from other States, or who, for other reasons, have not passed in elementary subjects, may take them at any time—*e. g.*, arithmetic after algebra or geometry ; English compositiou after rhetoric, etc.

*Time Limit.*—There is no limit of time, but all credentials issued by the University are good till cancelled for cause. Studies necessary to obtain any credential may be passed at different examinations.

## Notes on the Professional Requirements.

1. Seventy-five per cent. of correct answers is required in all subjects.

2. All subjects must be passed at the same examination.

Note.—When a candidate for license has been rejected in but *one* topic and his average is at least 80, at subsequent examinations he shall be examined only in the topic in which he originally failed to receive the required (75) percentage.

3. All examinations must be conducted in the English language.

4. Medical preparatory courses, as such courses are now taught in various scientific schools and colleges, cannot be accepted for one year of the three years' medical study required by the law.

### Powers and Duties of County Clerks in Registering Licenses to Practice Medicine in New York State.

The laws relating to registration of physicians by county clerks were repealed May 9th, 1893, when the new law took effect. The law forbids the registration of any authority to practise medicine except a license or diploma issued or indorsed as a license under seal by the University of the State of New York, or (in case of removal to another county of a physician already licensed) a certificate clearly showing that the original registration was of an authority issued or indorsed under seal by the regents.

To provide against penalties for illegal registration, all other cases should be referred to the University of the State of New York, the only authority by which licenses can be issued after September 1st, 1891.

Objects: To be a centre of intercommunication between the various churches and charitable agencies in this city. To foster harmonious co-operation between them, and to check the evils of the overlapping of relief. To investigate thoroughly and without charge the cases of all applicants for relief which are referred to the Society for inquiry, and to send the persons having a legitimate interest in such cases full reports of the results of investigation. To provide visitors who shall personally attend cases needing counsel and advice. To obtain from the proper charities and charitable individuals suitable and adequate relief for deserving cases. To procure work for poor persons who are capable of being wholly or partially self-supporting. To repress mendicity by the above means and by the prosecution of impostors. To promote the general welfare of the poor by social and sanitary reforms, and by the inculcation of habits of providence and self-dependence. It is not an almsgiving society, and its work is completely severed from all questions of religion, politics, and nationality. It is a clearing house of registration and experience for all the charitable activities of the metropolis. It has already instituted its system of exchange of information between its constituent societies (which includes all which will avail themselves of its services), and returns are received from the Department of Public Charities and Correction, sixty-four of the leading relief societies, fifty-five prominent institutions, and two hundred and three church socities, while other societies are being frequently added. It has records of 175,000 families who have applied for relief during the last ten years. The Society has now on active duty, in its district work, in personal service for the poor, 25 paid agents, 175 members of district committees, and about 50 friendly visitors.

# MEDICAL PRIZES.

## PRIZE OF THE MEDICAL SOCIETY OF THE COUNTY OF NEW YORK.

*Rules Governing the Award of the Prize.*

1st. The prize shall consist of a gold medal 150 grammes in weight (or $100 in cash), which shall bear upon one side the seal of the Society, and on the other the following: Awarded as the annual prize, by the Medical Society of the County of New York, to ————, for an essay on————.

2d. The essays shall be handed to the Committee on Prize Essays on or before the 1st of October in each year.

3d. Each essay shall be accompanied by a sealed envelope containing the name and address of the author and bearing on the outside the motto which is inscribed upon the essay.

4th. The writer of each essay is expected to present his dissertation in a plain and distinct handwriting, and with the pages bound in book form.

5th. Any clue by which the authorship of an essay is made known to the committee will debar such an essay from competition.

6th. Other things being equal, preference will be given to essays which exhibit original work on the part of the author.

7th. The Society does not consider itself as approving the doctrines contained in any of the essays to which the prize may be adjudged, and, in case of publication of a successful essay, the author shall be considered bound to print the above in connection therewith.

8th. The selection of the subject upon which to write will be left open to the competitors, but will be restricted to the field of what are called the departments of medical study.

9th. The Society will return to unsuccessful competitors their essays, if called for within six months after the award has been made.

10th. The committee is empowered not to award a prize in case none of the essays are worthy thereof.

11th. The prize is restricted to members of the Medical Society of the County of New York.

12th. The Society reserves to itself the right to require that the essay, for which a prize is awarded, shall be read before the Society previous to being placed at the disposal of the author (*vide* Committee on Prize Essays).

### STEVENS TRIENNIAL PRIZE.

The prize is open for universal competition. Established by the late Alexander H. Stevens, M.D. Awarded triennially. Amount $200. The administration of the prize is entrusted to a commission consisting of the President of the College of Physicians and Surgeons (ex-officio), the President of the Alumni Association (ex-officio), and the Prof. of Physiology in the same institution.

The prize is awarded to no essay unless it includes the results of original research by the writer upon the subject chosen.

The next award of this prize will be at the Commencement of the College in May, 1897. Essays must be sent to the President of the College before January 1st of that year.

### PRIZE OF THE MEDICAL SOCIETY OF THE STATE OF NEW YORK.

Merritt H. Cash Prize of $100 is offered for the best essay on any subject pertaining to the science or practice of medicine; the essay to be sent on or before December 1st of any year to any member of the Prize Committee, who are empowered to reject all judged unworthy of the award.

By vote of the Society this prize will be awarded only to members of the various County Medical Societies (*vide* Committee on Prize Essays of State Society).

# THE NEW YORK SOCIETY

FOR THE

# RELIEF OF WIDOWS AND ORPHANS

## OF MEDICAL MEN.

INSTITUTED 1842. INCORPORATED APRIL 18, 1843.

---

Annual members pay an initiation fee of $25, and $10 dues in semi-annual payments. Any person paying $100 at one time becomes a member for life, and $250, and upward, a benefactor. Members of the regular medical profession, residing in New York, Kings, Queens, Richmond and Westchester Counties, who are in good health, are eligible for election as members.

**Persons Entitled to Relief.** 1. The widow of a member whose income does not exceed eight hundred dollars per annum. If said widow shall marry again, her annuity shall cease. 2. Children of a member, males under sixteen and females under eighteen years of age and unmarried, and where the mother's income is not more than two hundred dollars per annum for each child respectively, in addition to the eight hundred dollars above mentioned. 3. Orphans of a member, males under sixteen, and females under eighteen years of age and unmarried, whose income does not exceed two hundred dollars per annum. Every child, on arriving at the age when the annuity ceases, shall receive the sum of fifty dollars as an outfit. In cases of prolonged ill health, or other extraordinary circumstances, the assistance granted to the surviving children of members may be extended beyond the limits of sixteen and eighteen years respectively. An aged mother, father or sister dependent on a member may receive assistance after a member's death. The marriage of the widow shall not invalidate the claims of the children to assistance from the Society. No one shall be entitled to claim assistance from the Society unless the person by virtue of whose membership the claim is made has been a member for the two years previous to his death.

Every widow of a member shall be entitled to four hundred dollars per annum, but for every ten dollars or multiple of ten dollars, of income, an amount fully equal to fifty per cent. of said income shall be deducted from the annuity. Every child entitled to relief shall receive one hundred dollars per annum, subject to the same reduction of fifty per cent. of income as above. When there are full orphans, then each case shall be specially investigated by the Standing Committee, and the amount fixed for every year, according to the circumstances of the case.

Total assets of the Society, October 2, 1895, $226,421.30.

OFFICERS.—Charles A. Leale, Pres.; A. B. Judson, E. Herrick, F. A. Castle, Vice-Pres'ts; A. F. Currier, Sec.; Henry Tuck, Treas.

The duration of human pregnancy is about 275 days. This is subject to some variation, and the longest period is still undetermined. As labor occurs in the larger proportion of cases between 270 and 290 days from the last menstruation, it is usual to reckon either from the first or last day of this period, taking as the mean 280 days, or a little over nine calendar months. For this approximate calculation the first day of the menstrual period may be used as being more readily ascertained. The table presents at a glance the beginning and end of 280 days for every day of the year. Find the date of menstruation in the upper line of the horizontal row, and the figure below, with the corresponding month, will indicate 280 days. In leap year, if the period of pregnancy includes February, the time for labor will be one day earlier than that given in the table.

# AMMONOL

is an Ammoniated-Phenylacetamide product of Coal-tar and differs from the numerous similar products in that it contains Ammonia in active form. As a result of this AMMONOL possesses marked stimulating and expectorant properties. The well-known cardiac depression induced by other Antipyretics, has frequently prohibited their use in otherwise suitable cases. The introduction of a similar drug, possessed of stimulating properties, is an event of much importance. AMMONOL possesses marked anti-neuralgic properties, and it is claimed to be especially useful in cases of dysmenorrhœa.—*The Medical Magazine, London.*

AMMONOL behaves as a stimulant as well as an antipyretic and analgesic, thus differing from other coal-tar products. It has been used in the relief of rheumatism and neuralgic pains, and in the treatment of the sequelæ of alcoholic excess. AMMONOL is also prepared in the form of salicylate, bromide and lithiate. The presence of Ammonia in a more or less free state gives it additional properties as an expectorant, diuretic and corrective of hyperacidity.—*London Lancet.*

Ammonol may be obtained from all Leading Druggists.

# CONTAGIOUS DISEASES.

## REGULATIONS OF THE BOARD OF HEALTH.

SECTION 98.—1. Whenever it becomes known to the principal or teacher in charge of a school that a contagious disease prevails in a house, other than a tenement, in which a child or children attending the school lives or live, such child or children shall be immediately excluded from the school, and shall not be readmitted except as elsewhere in this section provided.

2. Whenever the principal or teacher in charge ascertains that a contagious disease other than small-pox or typhus fever exists in a tenement house, but on one floor only, a child or children living on another floor of the same house need not for this reason be excluded, but children thus situated must be questioned daily about their health and that of their respective families, and must be sent home at the first sympton of illness or the first intelligence of contagion in their families.

3. But if a contagious disease of any description exists on more than one floor of a tenement house, or if the disease existing on only one floor be small-pox or typhus fever, all children living in the house must be promptly excluded from the school.

4. Children excluded in pursuance of the above rules shall not be again permitted to attend school—

In case of scarlet fever, until three weeks after the *beginning*

of the last case, on the floor or in the house, according to whether the exclusion has applied to the floor or an entire house under the above rules.

In case of measles, until two weeks after the *beginning* of the last case, on the floor or in the house, according to the extent of exclusion.

In case of diphtheria, until one week after the *termination* of the last case, on the floor or in the house, according to the exclusion.

In case of scarlet fever, measles, or diphtheria, until a certificate of the Board of Health is produced, stating that the apartments, bedding, and clothing affected by contagion have been properly disinfected.

If the disease be small-pox or typhus fever, children who have been in such a case excluded must not resume their attendance without producing a certificate from the Board of Health stating it is safe for them to do so.

5. New scholars applying for admission, living in houses or on floors where a contagious disease prevails, must be admitted or excluded in compliance with the above rules.

6. Principals and teachers in charge are required to communicate to the Clerk of the Board of Education any information received by them relevant to this subject not known to be in his possession.

7. Hereafter all children attending the schools under the control of this Board, and residing in orphan asylums, infirmaries, homes, nurseries, or other institutions, shall regularly furnish to their respective principals weekly certificates signed by a duly licensed and competent physician of good standing, to the effect that during the week preceding the date of such certificate there were no contagious or infectious diseases of any kind in such asylum, infirmary, home, nursery, or institution, and no principal shall allow the attendance at school of any such children unless such certificate herein required is furnished as aforesaid; and all such certificates shall be preserved by said principals for one year.

8. If the certificate should show that there was any such disease in such orphan asylum, infirmary, home, nursery, or institution, or if any principal should, from any other source, ascertain the existence of any such disease in any such orphan asylum, infirmary, home, nursery, or institution, such principal shall forthwith dismiss from attendance all pupils residing in such orphan asylum, infirmary, home, nursery, or institution, and such pupils shall not be allowed to attend until authorized by the committee on By-Laws, Elections, and Qualifications of the Board of Education.

# STAMMERING.

## The Bryant School for Stammerers.

***For the Correction of Stammering and Other Affections of Speech where Drill in Articulation and the Technique of Speech are Indicated.***

As much of the speech apparatus is under control of the will, considerable may be done for those who suffer from speech defects by a careful training of the respiratory, vocal and articulating organs. This training is given under the direction of a physician with sixteen years' experience. The profession may rely upon having the best treatment known for those who apply to them. Such remedies for nervous and physical conditions as are indicated are also judiciously used. The circular, "How We Treat Stammering To-day," giving outline, information and references from eminent men and pupils, sent to any address mentioned.

## MEDICAL DEPARTMENT.

## FIFTY-SIXTH YEAR, 1896-97.

## SPECIAL ANNOUNCEMENT.

**THE SESSION OF 1896-97 WILL BEGIN WEDNESDAY, SEPTEMBER 30, 1896,**

Attention is called to the fact that the curriculum has recently been again entirely remodeled and greatly improved.

It now consists of a four years' graded course, a brief synopsis of which follows:

**1st Year.**—Lectures and recitations from text-books on Anatomy, Physiology, Histology and Chemistry. Laboratory work in Histology and Chemistry. Dissection. Demonstration to sections in Anatomy.

**2d Year.**—Lectures on Surgical and Regional Anatomy, Experimental Physiology, Experimental Chemistry, Physics and Hygiene, and Materia Medica. Recitations from text-books on Anatomy, Physiology and Chemistry (continued), and on Pathological Anatomy, Practice of Medicine, Surgery, Materia Medica and Obstetrics. Demonstrations on the Manikin. Laboratory work in Pathology, Bacteriology and Materia Medica. Dissection. Demonstrations to advanced sections, and Demonstration-lectures in Anatomy.

**3d Year.**—Lectures on Practice of Medicine, Surgery, Obstetrics, Gynæcology, Therapeutics and Pathology, with Autopsies. Recitations on Practice of Medicine, Therapeutics, Obstetrics, Gynæcology and Pathology. Bedside teaching in small classes in the Wards of Bellevue Hospital on Medicine, Surgery and Gynæcology. Clinics in Bellevue Hospital and the College Building on Medicine, Surgery and Gynæcology.

**4th Year.**—Clinical, Hospital and Dispensary teaching will be the chief feature of the fourth year, combined with lectures on advanced topics. Special Clinics will be given in Ophthalmology, Otology, Laryngology, Orthopœdy, Pediatrics, Skin Diseases, Venereal Diseases, Nervous Diseases and Insanity. Also Clinics in General Medicine, Surgery and Gynæcology.

NOTE.—There are two remaining years of the original three-years' course. Students coming from other medical colleges of recognized standing will be admitted to either of them, for the last of which examinations are required in such branches only as have already been completed at the time of admission. The curriculum of these two years follows:

**2d Year.**—Lectures on Surgical and Regional Anatomy, Experimental Physiology, Experimental Chemistry, Physics and Hygiene, and Materia Medica. Recitations from text-books on Pathological Anatomy, Practice of Medicine, Surgery, Materia Medica, Obstetrics and Demonstrations on the Manikin Laboratory work in Pathology; Clinics in Bellevue Hospital and the College Building, on Medicine, Surgery and Gynæcology, and Practical Clinical work in Sections in Medicine and Surgery.

**3d Year.**—Lectures on Practice of Medicine, Surgery, Obstetrics, Gynæcology, Therapeutics and Pathology, with Autopsies. Bedside teaching in small classes in the Wards of Bellevue Hospital on Medicine, Surgery and Gynæcology. Clinics in Bellevue Hospital and the College Building on Medicine, Surgery and Gynæcology.

# DITMAN'S SEA SALT

## Is the NATURAL SALT of Pure Sea Water.

By the aid of *"Ditman's Sea Salt,"* which is now furnished in large or small packages and at very moderate price, the benefits of the ocean bath can be brought to our homes. By dissolving this article in water we have exactly the fluid in which we immerse ourselves when we take a surf bath. The tonic and remedial effects of true sea water on many varities of disease are so well known that it is unnecessary here to enlarge on them. For all who are weak, rheumatic, nervous or dyspeptic the salt bath at home possesses qualities so excellent that its use should be universal. This preparation, "Sea Salt," has not only attained universal popularity, but is so thoroughly endorsed by the medical profession that no family need for a moment hesitate to give it a cordial home welcome.
